

John Dunicliff (Course Director) and **Paolo Mazzanti** (Course Organizer)
are pleased to invite you at the

5th International Course on Geotechnical and Structural Monitoring

The IcGSM is growing year by year since its first edition in 2014 and, up to now, more than 450 attendees improved their technical knowledge with us!
40 international leaders have joined the courses as **invited speakers** and have presented their interesting projects from all around the world.

The course is a great opportunity to get in touch with important international companies in the field of monitoring who will show their products in the **exhibition area**.

Who should attend the course:

engineers, geologists and technicians who are involved with performance monitoring of geotechnical features of civil engineering projects, project managers and other decision-makers who are concerned with risk management during construction.

Master Classes on geotechnical and structural monitoring systems are planned on the **21st May 2018**.

These short courses will be led by international experts and will provide practical know-how on the most common monitoring systems.

TOPICS:

Inclinometers Total Stations
Piezometers Terrestrial RADAR
Extensometers Vibration Monitoring

Field Trip will be

organized at the
Roman Forum
archaeological area in
Rome city center, on the
25th May 2018.

You could learn more
about the monitoring
systems, strolling among
the **ancient ruins** as the
Basilica of Maxentius and
the Temple of Venus!

Join the participant sessions:
NEW TRENDS and CASE HISTORIES!
