

**Model 3810 Thermistor String**

The Model 3810 Thermistor String comprises a number of individual 3800 sensors mounted in rugged, multi-conductor cables for multiple temperature measurements in a single borehole. Thermistor strings are manufactured according to customer requirements for overall length, number of sensors and accuracy.

**Specifications**

|                       |                 |
|-----------------------|-----------------|
| Standard Range        | -50°C to +150°C |
| Resolution            | 0.1°C           |
| Accuracy <sup>1</sup> | ±0.5°C          |
| Temperature Range     | -20°C to +80°C  |

<sup>1</sup>Accuracy of ±0.2°C available on request.
